SKILL 1

IAM User Creation

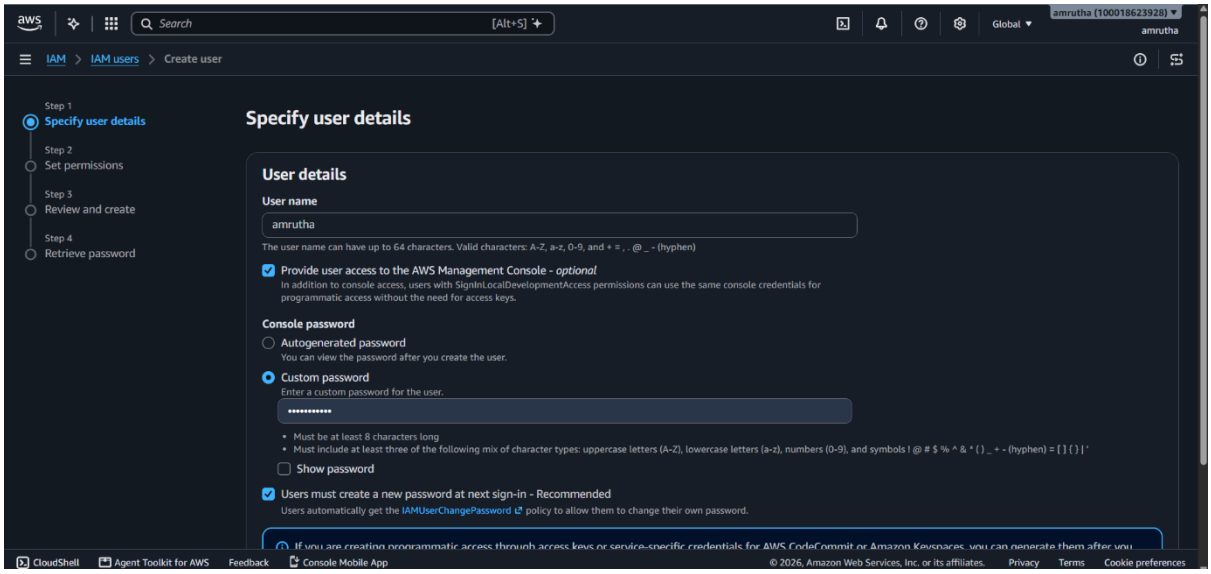

1. Open IAM: Search for IAM in the AWS Management Console and select the IAM service.

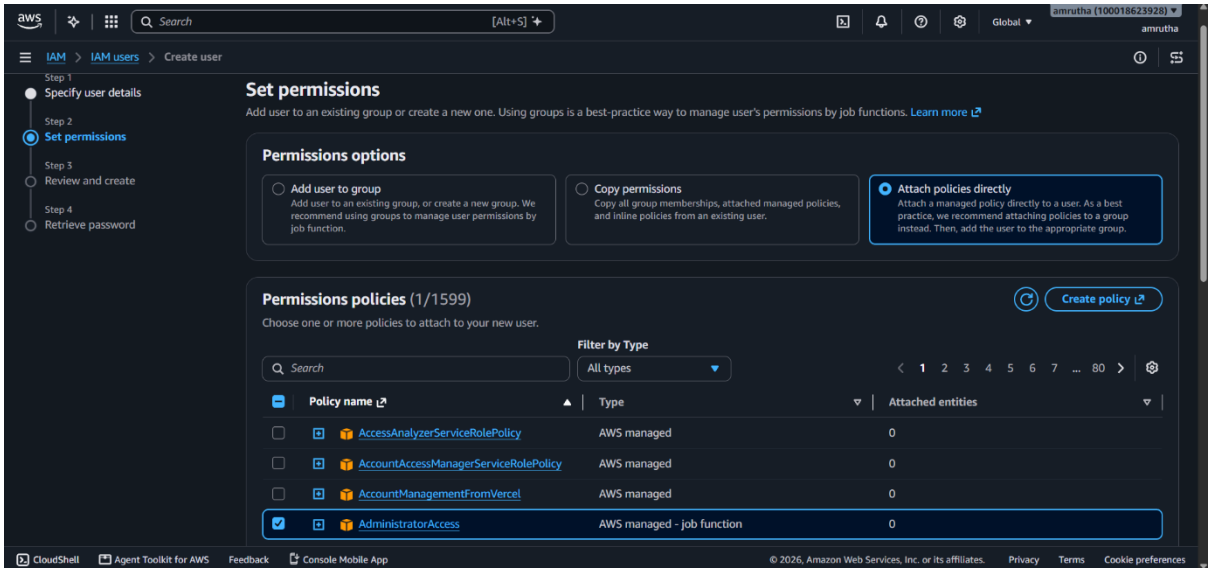

2. Navigate to IAM Users: Select IAM Users from the left-side menu and click Create user.

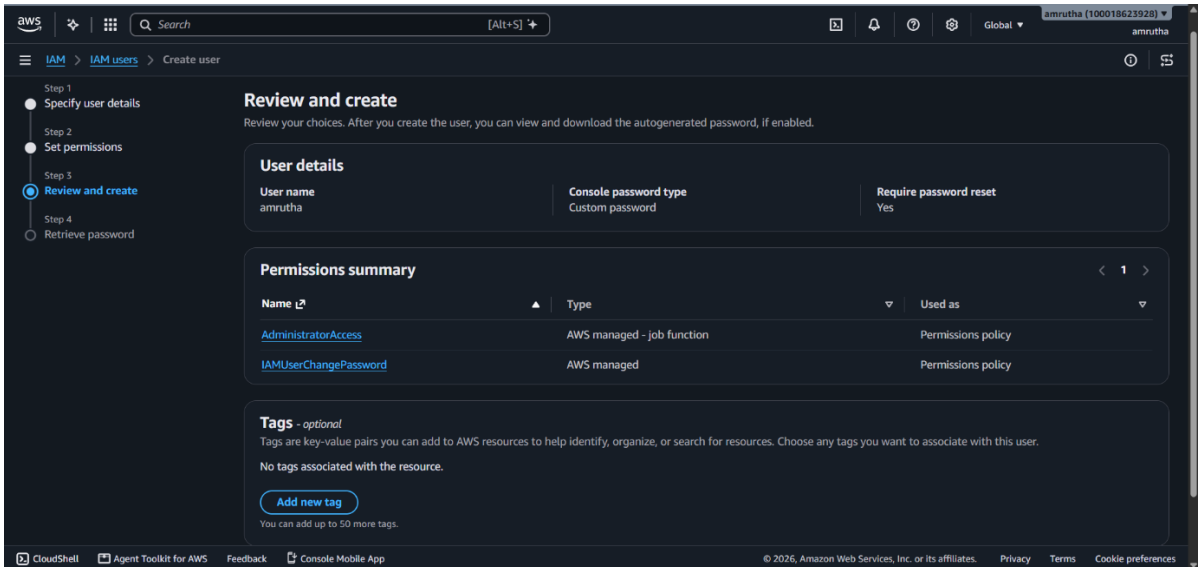

3. Specify User Details: Enter the username, enable AWS Management Console access, set a custom password.

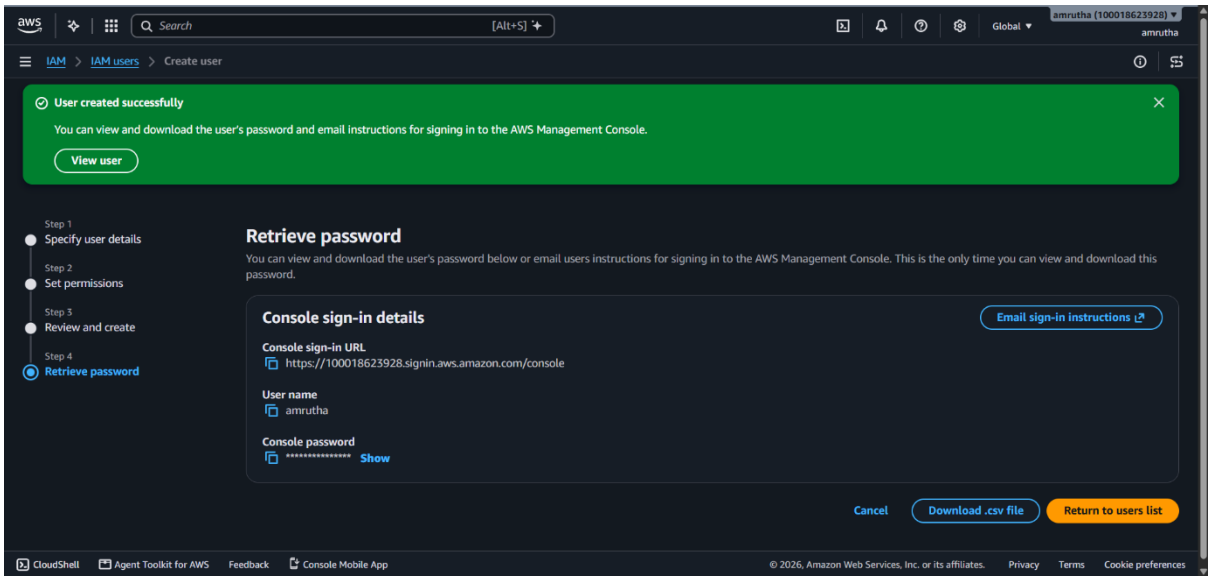

4. Set Permissions: Select Attach policies directly and choose the AdministratorAccess policy.

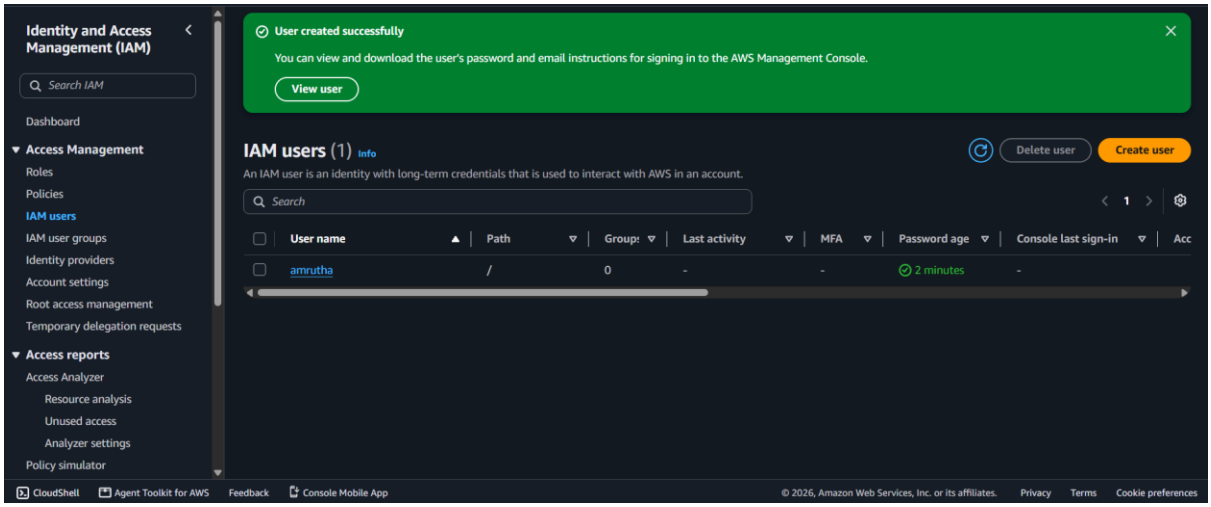

5. Review and Create: Verify the username and assigned permissions, then click Create user.

6. View the generated console sign-in details, including the sign-in URL, username, and password, and download the CSV file.

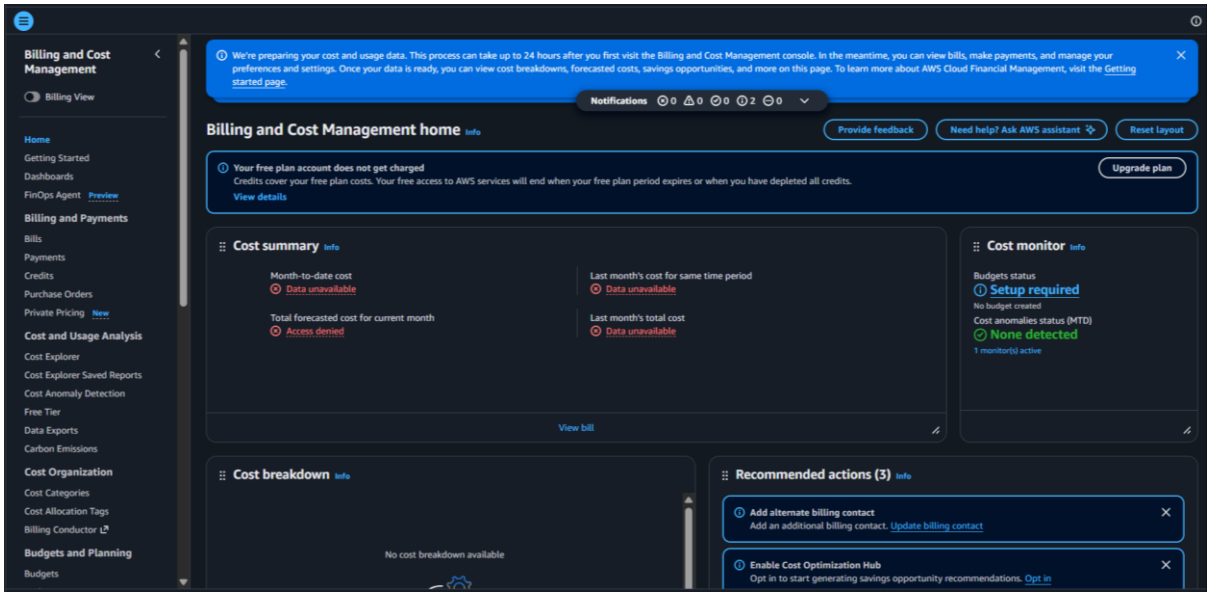

7. Verify User Creation: Return to the IAM Users page and confirm that the newly created user appears in the user list.

Billing Alert Set Up

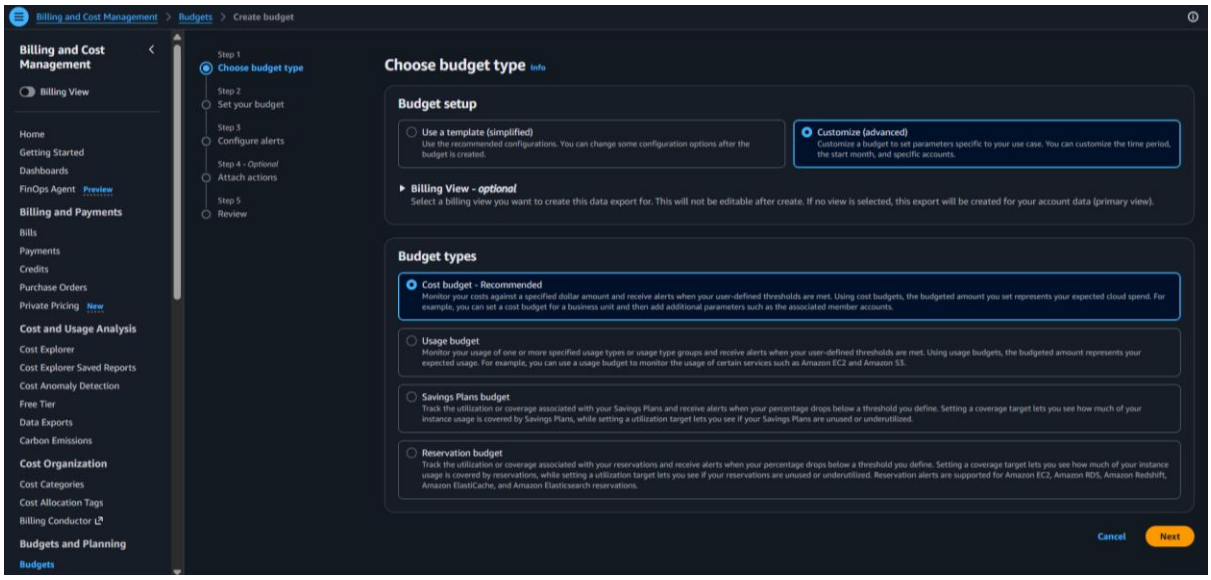

1.Search up billing and go to ‘Billing and Cost Management’

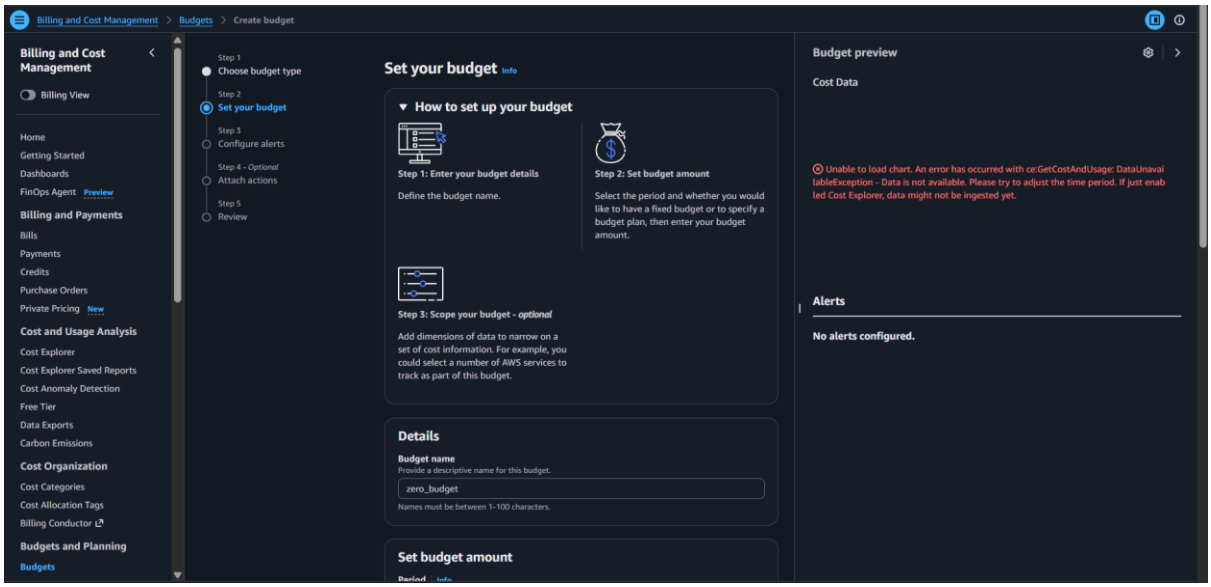

2.Go to ‘Budgets’ from left dashboard and Create a budget

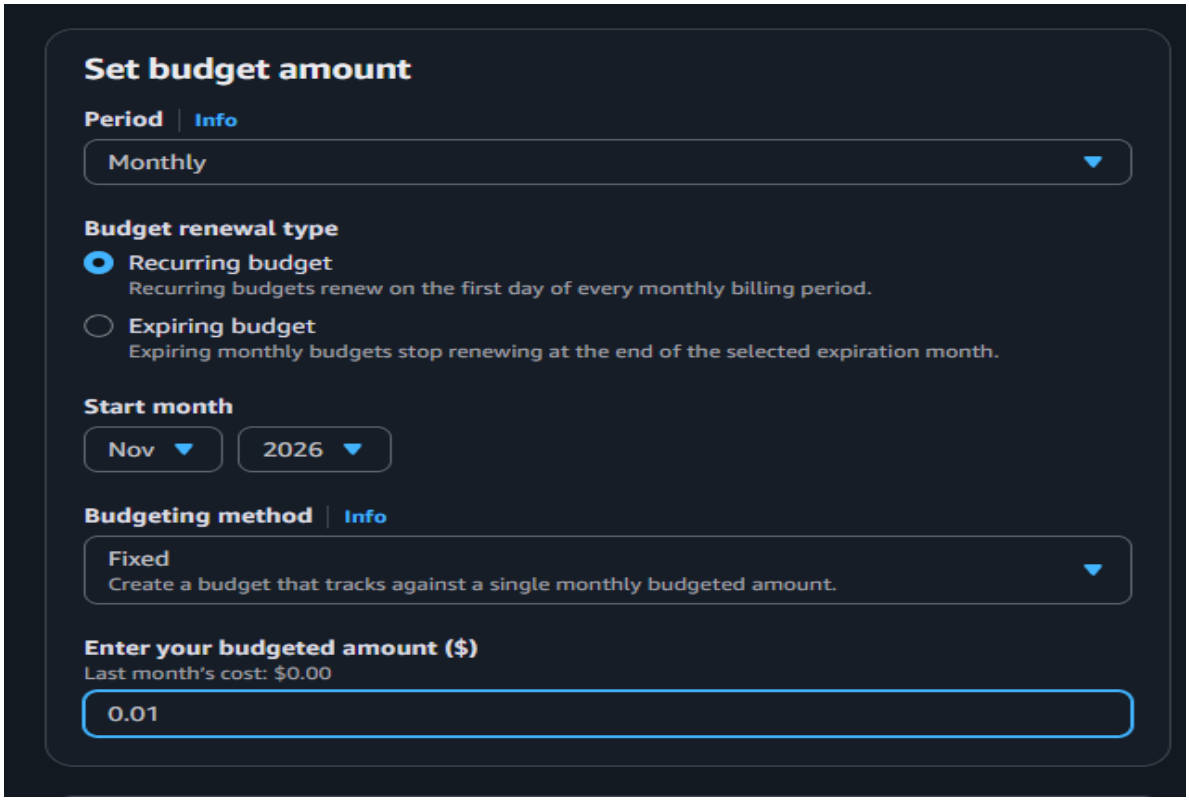

3. Choose Custom

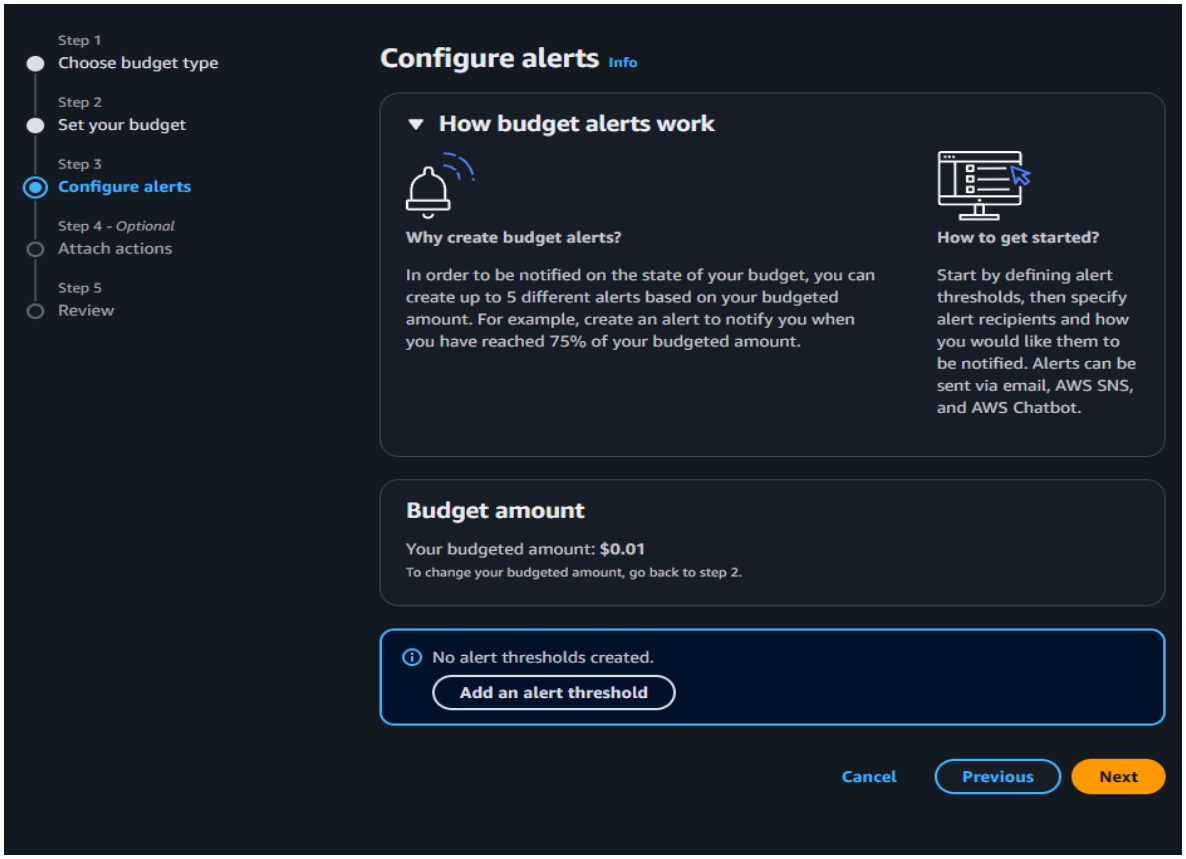

4. Give budget name as ‘zero_budget’

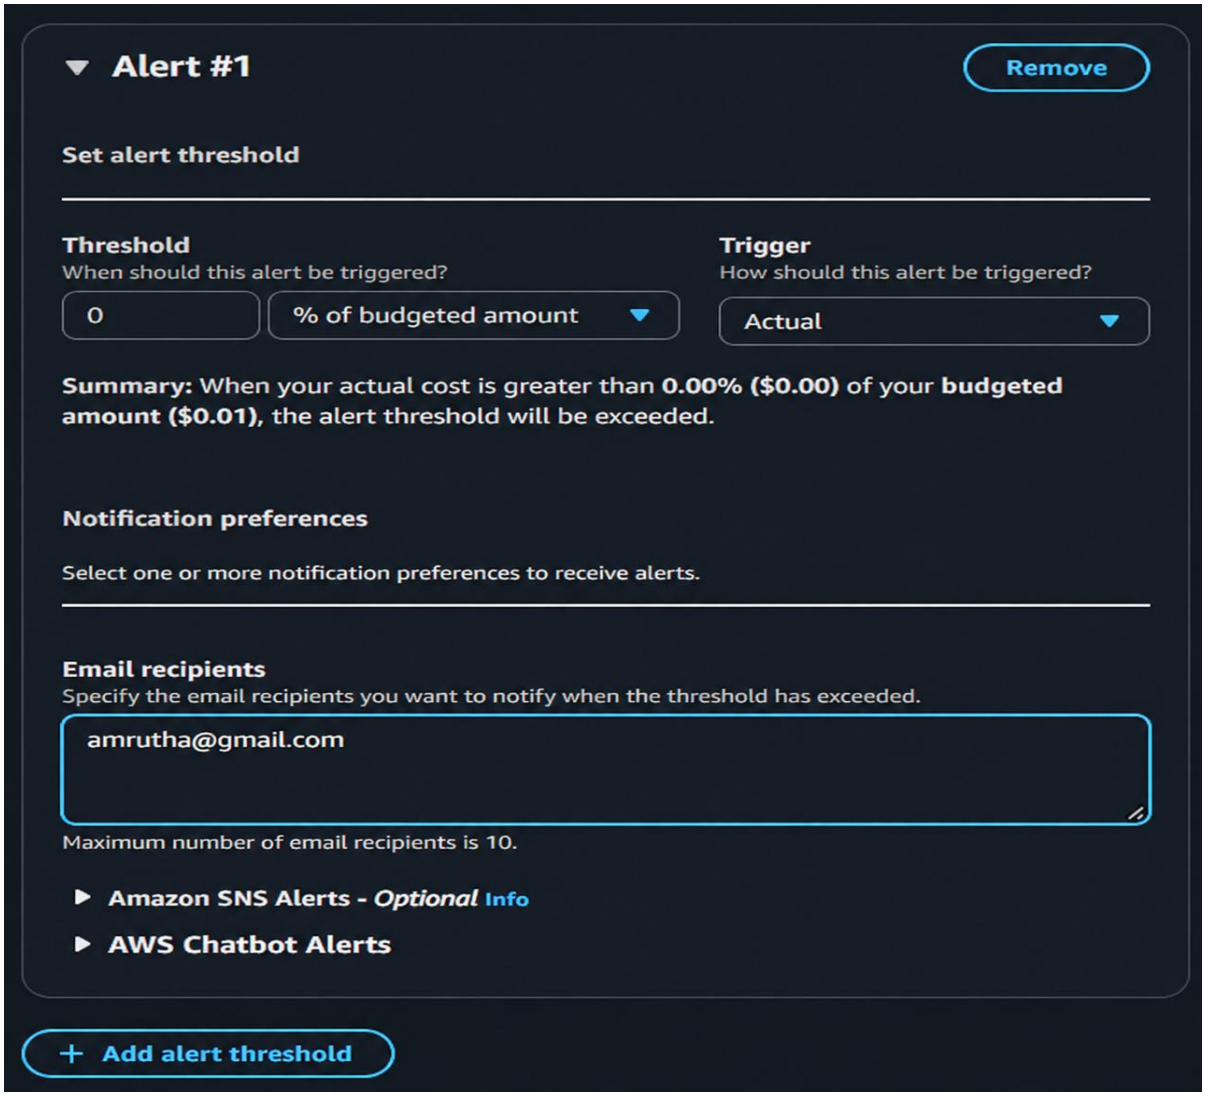

5.Set the budget amount as 0.01

6.Click on 'Add an alert threshold'

7.Select 0 as threshold and enter your email

8.Verify budget details and create the budget
